## If you choose to utilize strength training, it's best to do it immediately after you run 2-3Xs per week A good rule of thumb is to intake liquids every 30-45 mins on a long run & nutrition every 60 mins The long runs are provided as a range to factor in weather, nutrition, and personal life, which can significantly impact the distance you choose that day

### **KEY TERMS**

#### Strides

- Begin after your heartrate has slowed post-run & breathing is normal
- Generally 80-100 meters long each
- 85-90% of sprint pace, focused on good form and diaphragmatic breathing

#### amprap

- Stands for "As Much Running As Possbile"
- Try to run the entire mileage, even if it has to be at a slower pace
- The goal is to keep the heart rate elevated for the entirety of the run
- All long runs are AMRAP
- Once you have a solid base built, all runs should be AMRAP unless stated otherwise

#### Uptempo Over Hills

- Pick a hilly route or utilize the incline on your treadmill
- Flat/downhill portions of your run are a walk or light jog
- · Run and increase your power/pace on uphills
- If on the treadmill, alternate every 1-2 minutes with an incline of 5%

#### Progression

- Run begins at a light jog pace
- Pace gradually increases each half mile or so by 5-10 seconds/mile
- The goal is to get faster throughout the run and end with a HR in Zone 4

#### XT

- Endurance cross training
- The best options are aquajogging, swimming, cycling, and elliptical
- HR Zone 1 is listed, but can be pushed into Zones 2 or 3.

#### Fartlek

- Varying pace between a harder effort run & a light jog/brisk walk
- Example: 3-2 is 3 minutes at a hard effort and 2 minutes at recovery jog/brisk walk pace for the provided amount of mileage

#### Heart Rate Jones

- Zone 1: 50%-60% of maximum heart rate
- Zone 2: 60%-70% of maximum heart rate
- Zone 3: 70%-80% of maximum heart rate
- Zone 4: 80%-90% of maximum heart rate
- Zone 5: 90%-100% of maximum heart rate

To calculate your maximum heart rate, subract your age from the number 220. Example: Age 40 →220-40 = 180 beats per minute (can be a range of ~5-10 bpm)
